Software engineering

Summary

Software engineering graduate with over a year of hands-on backend development experience in a student position. Looking to join a challenging environment where I can grow professionally, contribute meaningful value, and continue developing my technical and problem-solving skills.

Education

2014-2017 - **Ofek High School**

2021 - 2025 - **Software engineering degree**
Braude College of Engineering
GPA - 92.5

Experience

- **2024**
Tutor - Automate & Computability, Probability, Algorithms, Data Structures.
- **2024 - 2025**
Elbit naval systems - Software development student.
Collaborating with diverse teams to develop new features and functionalities for autonomous ships.

Military Service

2014 - 2017 - Full military service as a combat soldier in Golani unit.

Additional information

- **President's Excellence Award Recipient - 2025**
- **Course Python Pro Bootcamp:**
API, Web, Pandas, NumPy.
- **Projects I Built:**
 - **Cheapest Flight Finder**: Python app integrating flight APIs to find the cheapest flights, with Twilio SMS notifications and Google Sheets storage.
 - **Park Management Software (GoNature)**: Java client-server app using JavaFX and OCSF, following OOP and MVC principles with full UML documentation.
 - **Nutri+**: Full-stack web app for meal planning and nutrition management, built with React, Node.js, Express, and MongoDB.
